

# HOW MANY?

These pets have some number questions and they need your help. Figure out the answer and write it in the blank space.

**A)** A Persian cat has six kittens. Two are black and three are ginger. How many are white? \_\_\_\_\_

**B)** A pony's trophy cabinet needs organising. If she has six ribbons, four trophies and five medals, then how many awards does she have? \_\_\_\_\_

**C)** A Jack Russell is taken for a 1km walk every day, except for the weekends when he walks for 2km a day. How many kilometres does he walk in a week? \_\_\_\_\_

**D)** A parrot can speak 20 words already. If he learns two new words a day, how many words will he be able to speak in four days' time? \_\_\_\_\_

**E)** There are four spiders in a glass enclosure. How many legs are there? \_\_\_\_\_

**F)** A tortoise has 10 leaves in his enclosure. It eats two and uses four as bedding. How many does it have left? \_\_\_\_\_

**G)** There is a school of fish in a bowl and they are different colours: four are blue, three are red, one is yellow and six are orange. How many fish are there in total? \_\_\_\_\_

**H)** Three lizards are trying to catch 12 flies. One has quickly caught four already and the other has just caught two. How many are left for the last lizard? \_\_\_\_\_

**I)** A family of six hamsters shares a cage. One hamster house will only fit four of them though. How many need to sleep in the other hamster house? \_\_\_\_\_
